

Technology Instruction Page

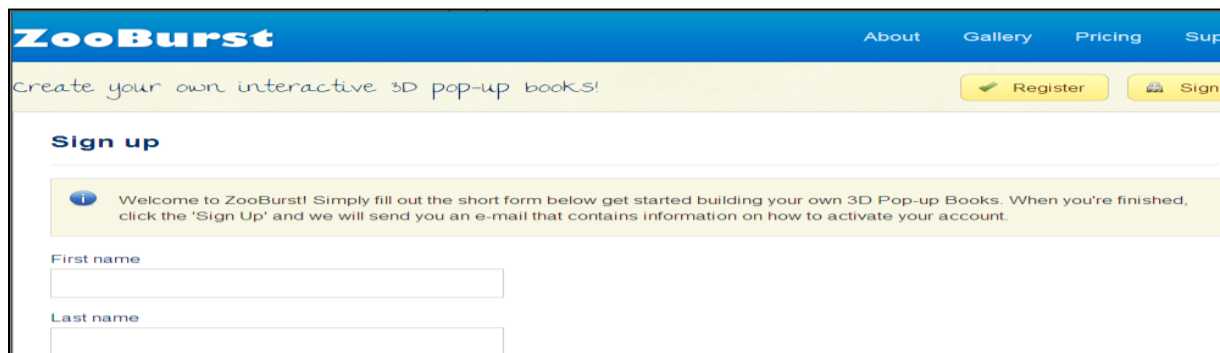

ZooBurst

ZooBurst is a digital storytelling tool that lets anyone easily create his or her own 3D pop-up books.

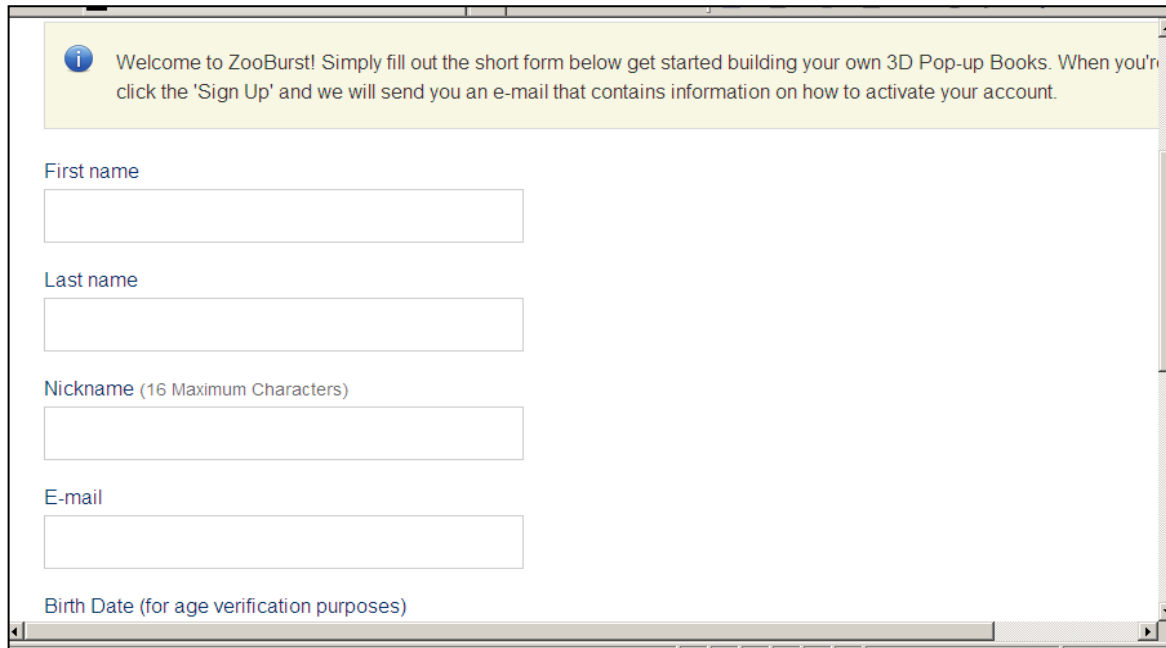

1. Go to <http://www.zooburst.com/> and register for an account.

2. There are two different accounts that you are able to register for ZooBurst so register for the personal/teacher account.

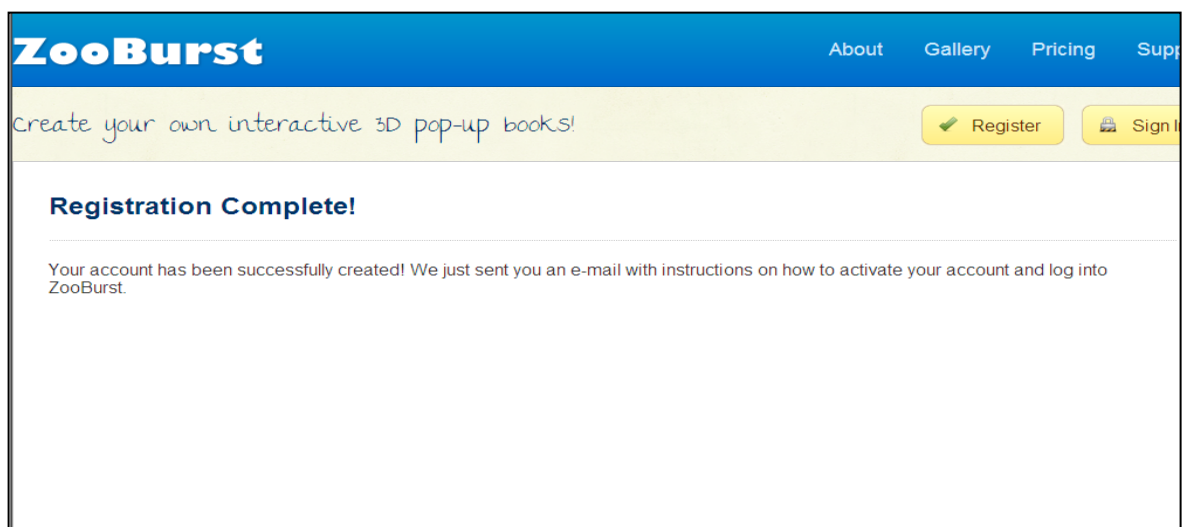

3. Complete the registration form with the required information. Be sure to click on the box that you agree to the terms of service.

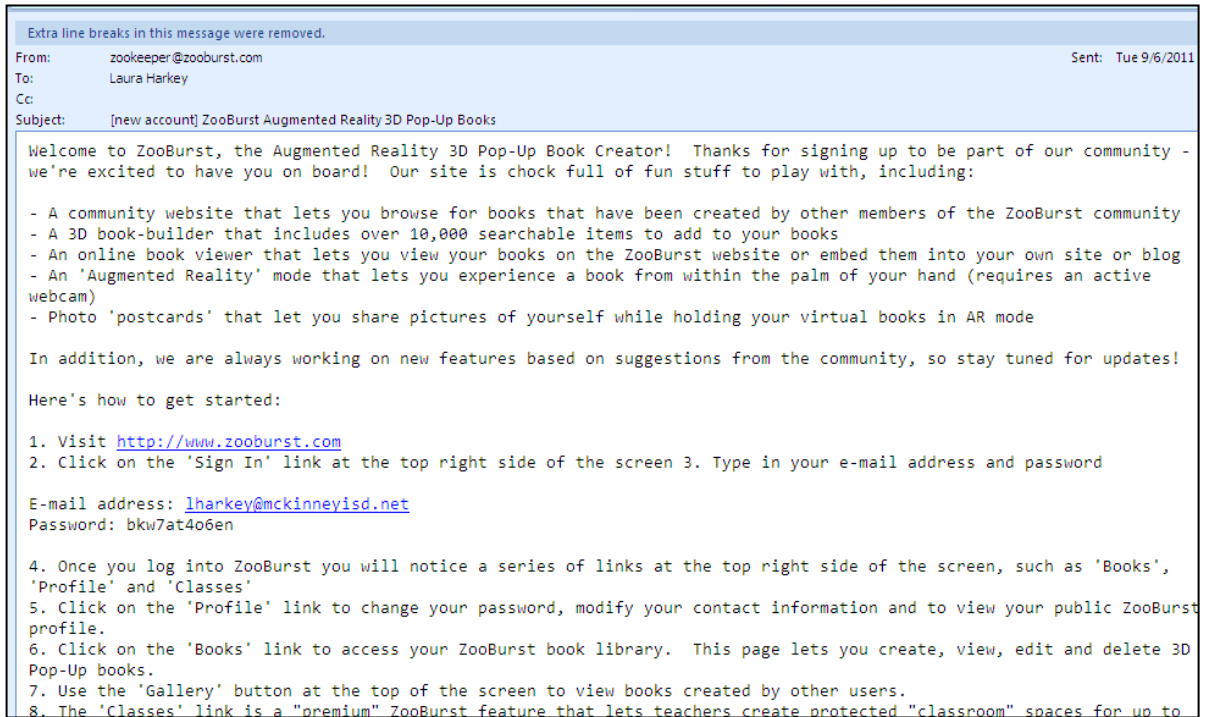

A screenshot of a web browser window showing the ZooBurst registration form. At the top, a yellow banner contains an information icon and the text: "Welcome to ZooBurst! Simply fill out the short form below get started building your own 3D Pop-up Books. When you click the 'Sign Up' and we will send you an e-mail that contains information on how to activate your account." Below the banner are five input fields: "First name", "Last name", "Nickname (16 Maximum Characters)", "E-mail", and "Birth Date (for age verification purposes)".

4. Registration will be complete.

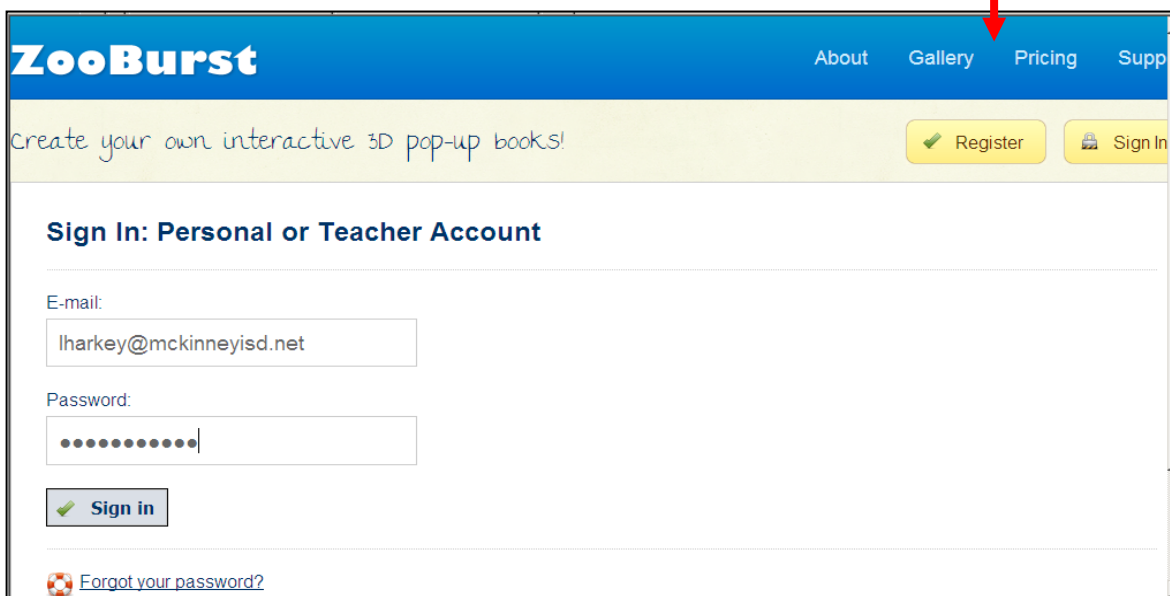

A screenshot of the ZooBurst website's registration completion page. The top navigation bar is blue with the "ZooBurst" logo on the left and links for "About", "Gallery", "Pricing", and "Support" on the right. Below the navigation bar is a yellow banner with the text "Create your own interactive 3D pop-up books!" and two buttons: "Register" (with a green checkmark) and "Sign In" (with a user icon). The main content area features a heading "Registration Complete!" followed by a message: "Your account has been successfully created! We just sent you an e-mail with instructions on how to activate your account and log into ZooBurst."

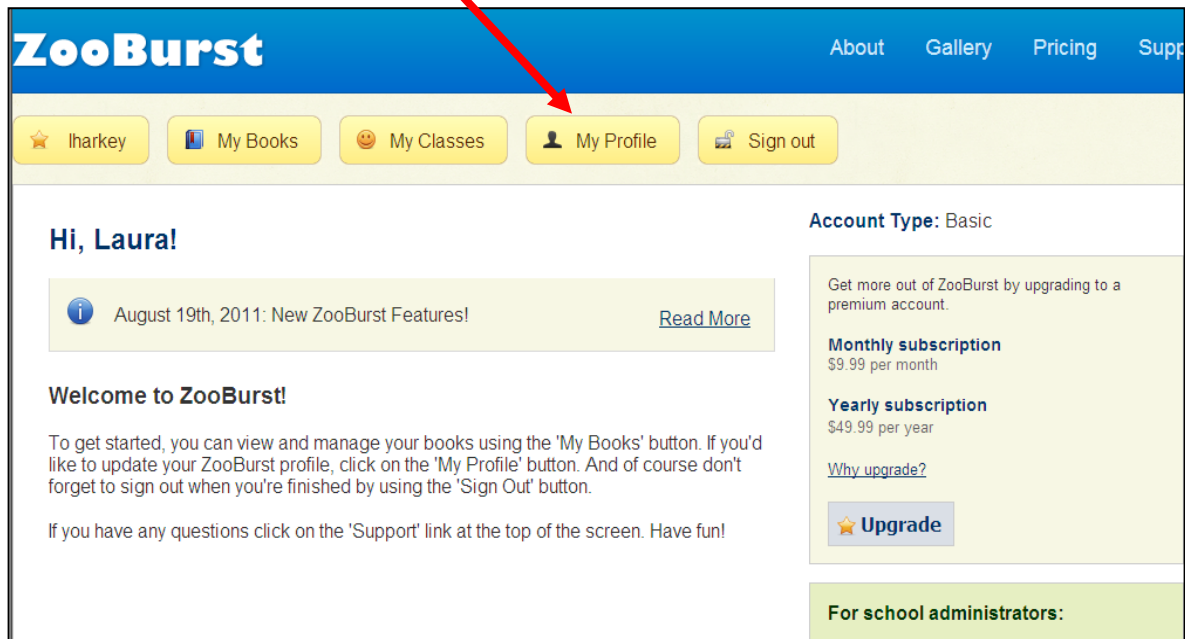

5. An email will be sent your address welcoming you to Zooburst.

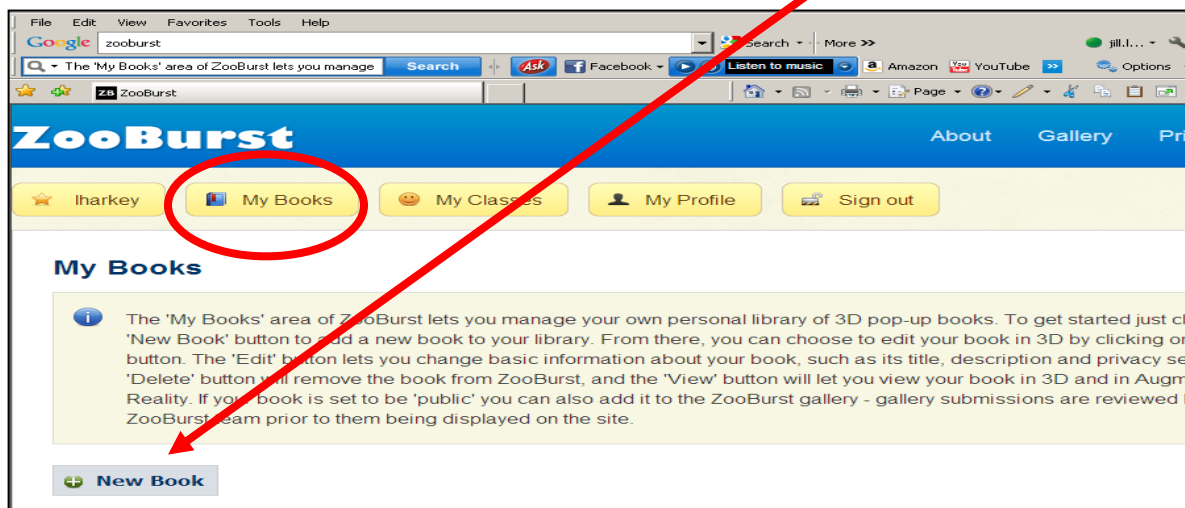

6. Using the link in the email, log into Zooburst. Click on the sign in link at the top of the right side of the screen. Type in your email address and password.

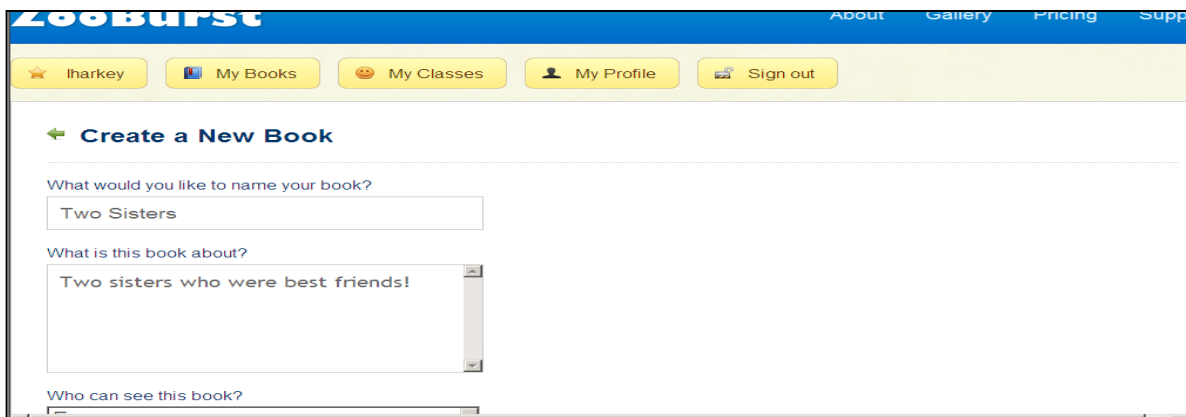

- Once logged in, the screen will show a series of links at the top of the page.
- Click on **My Profile** to change your password from the one Zooburst assigned to the account. **My Classes** is only accessible to premium account holders to set up protected student accounts.

- Click on the **My Books** tab. Then click on the **gray New Book** button to add a new book to your library.

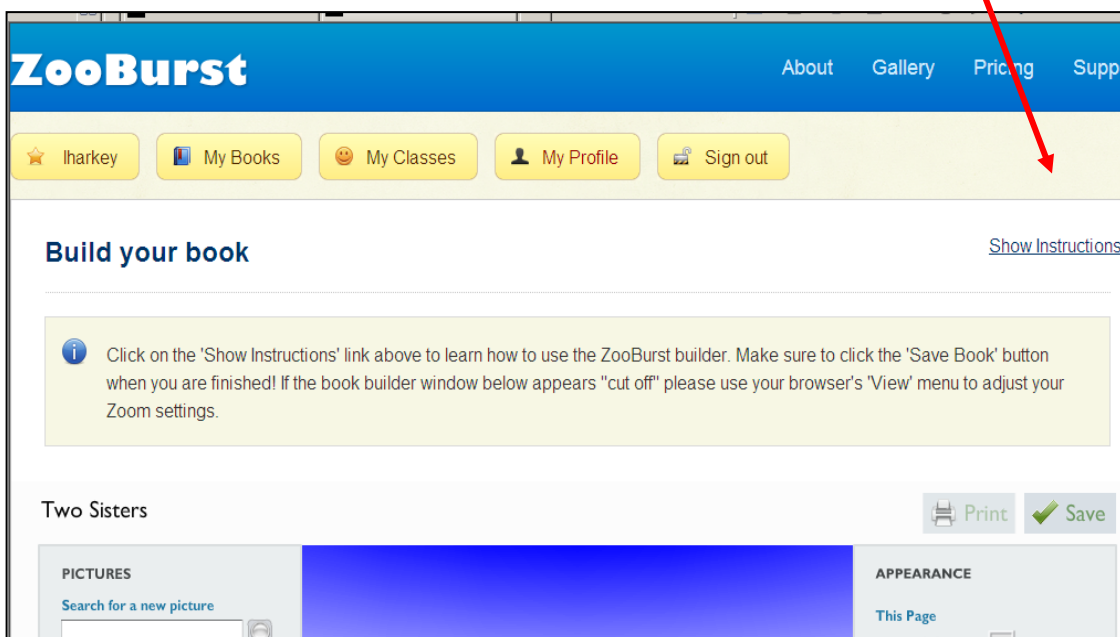

10. Just follow the step by step instructions for creating your new book. What is the title? What is this book about? Who can see this book? There are three choices: Everyone, only people with a valid password, or only myself. If you set it to "Everyone" then you can add it to the Zooburst gallery. The stories are reviewed by the Zooburst Company before being displayed on Zooburst. Who can comment on this book? Yes or no.

The screenshot shows the 'Create a New Book' form on the Zooburst website. The form has a blue header with the Zooburst logo and navigation links (About, Gallery, Pricing, Supp). Below the header is a yellow navigation bar with buttons for 'Iharkey', 'My Books', 'My Classes', 'My Profile', and 'Sign out'. The main form area is white and contains the following fields:

- A text input field for the book title, containing 'Two Sisters'.
- A text area for the book description, containing 'Two sisters who were best friends!'.
- A dropdown menu for 'Who can see this book?'.

11. Make sure to click the Save Button! Click on the "Show Instructions" link to learn some helpful tips about using the ZooBurst builder.

The screenshot shows the 'Build your book' page on the Zooburst website. The page has a blue header with the Zooburst logo and navigation links (About, Gallery, Pricing, Supp). Below the header is a yellow navigation bar with buttons for 'Iharkey', 'My Books', 'My Classes', 'My Profile', and 'Sign out'. The main content area is white and contains the following elements:

- A blue header for the 'Build your book' section, with a 'Show Instructions' link on the right.
- A yellow information box with a blue 'i' icon and text: 'Click on the 'Show Instructions' link above to learn how to use the ZooBurst builder. Make sure to click the 'Save Book' button when you are finished! If the book builder window below appears "cut off" please use your browser's 'View' menu to adjust your Zoom settings.'
- A book title 'Two Sisters' and a 'Print' button.
- A 'Save' button with a green checkmark icon.
- A 'PICTURES' section with a search bar and a 'Search for a new picture' button.
- An 'APPEARANCE' section with a 'This Page' button.

A red arrow points from the text 'Show Instructions' in the previous block to the 'Show Instructions' link on this page.

12. This screen shows tips about constructing your own pop-up book. There is also a copy of the ZooBurst User Manual that can be downloaded to use as a reference.

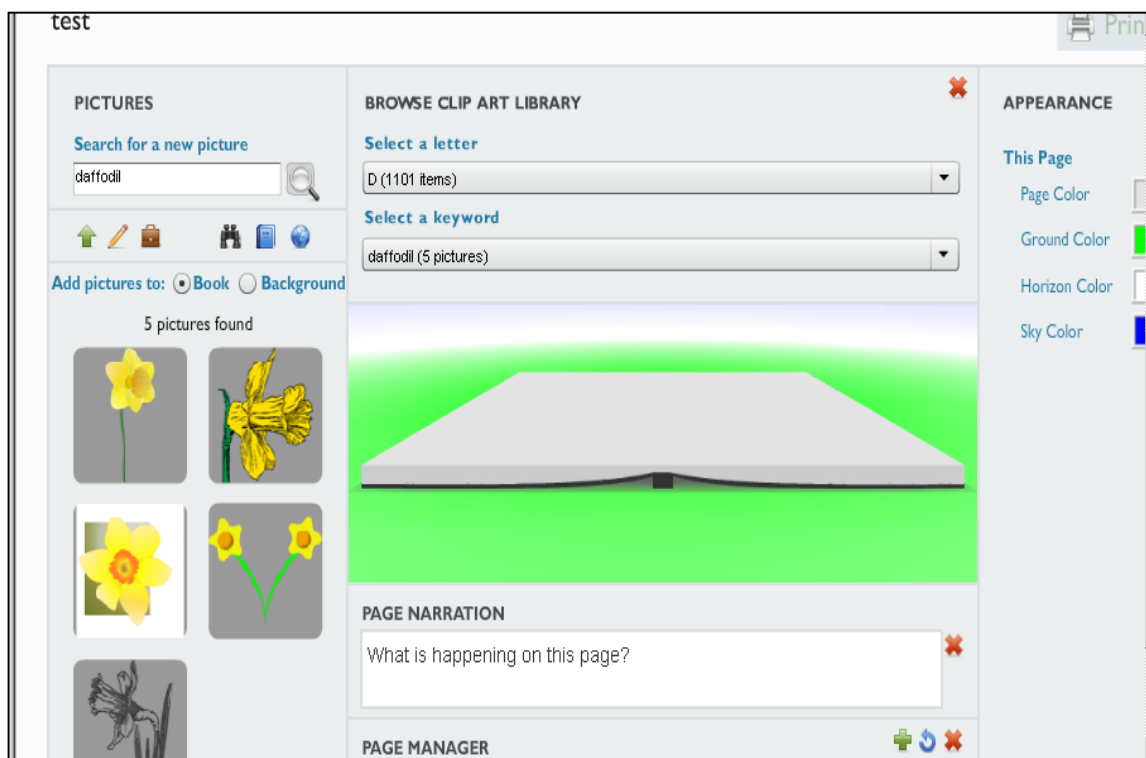

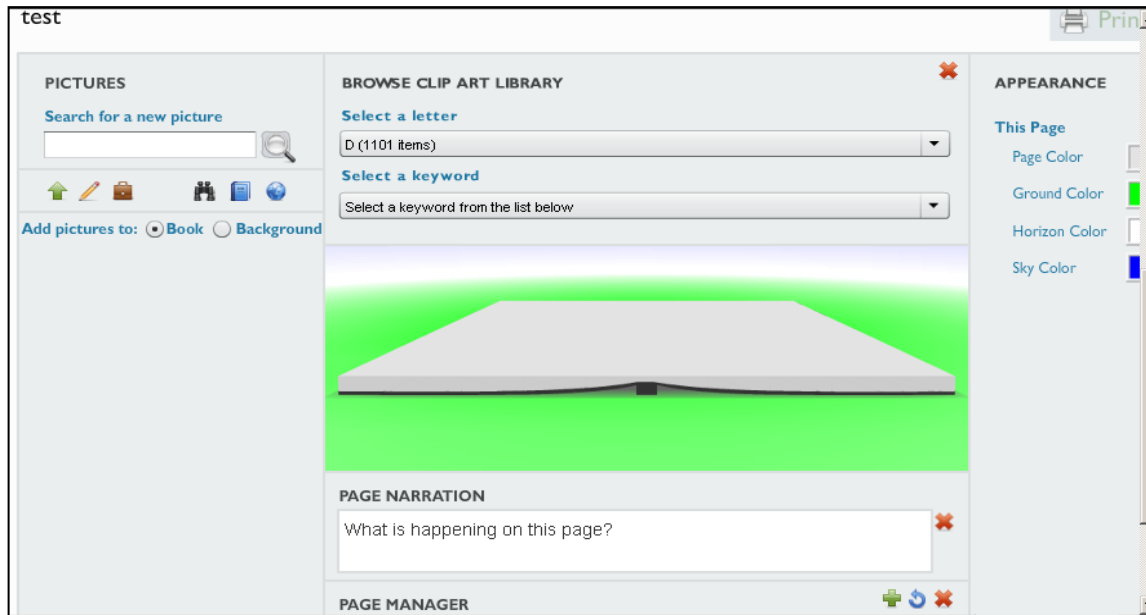

i The screen below is a graphical interface that lets you visually construct you own pop-up books. We will soon be releasing a video that outlines the basics of using the BookBuilder, but here are some helpful tricks to get you started:

- The left side of the screen contains the 'Pictures' panel. This panel lets you search for pictures via the Open Clip Art Library as well as upload your own photos to ZooBurst. To search, type in a keyword into the blank provided - if ZooBurst finds a match you will see a series of thumbnails that correspond to with your request. Clicking on a thumbnail will cause that character to appear in your book.
- Once you have an item in your book you can drag and drop it anywhere on the current page. You can also use the 'Appearance' panel on the right side of the page to change the character's size, rotation, tilt and color. Keep in mind that your character must always be on the page - ZooBurst will display a red "No" symbol when your character hits a boundary.
- You can also add characters and scenery elements to the background of your book. Simply click the 'Add Pictures to Background' button and then click on a character in the Pictures panel. The character will appear on the background and you can drag it around and adjust its size and rotation using the Appearance panel.
- If you want your characters to "speak" when clicked on, you can click on a character and then click on the 'Character Text' panel at the bottom of the screen to pull up a text editor. Anything you type in this editor will appear in a "chat bubble" over the character's head when you publish your book. This editor also allows you to make portions of your text bold faced, change the color of your text and event include links to other websites,
- If you click on the book itself you will see the 'Book Appearance' panel appear on the right side of the screen. This panel lets you change the color of the sheet of paper as well as the color of the ground, horizon and sky.

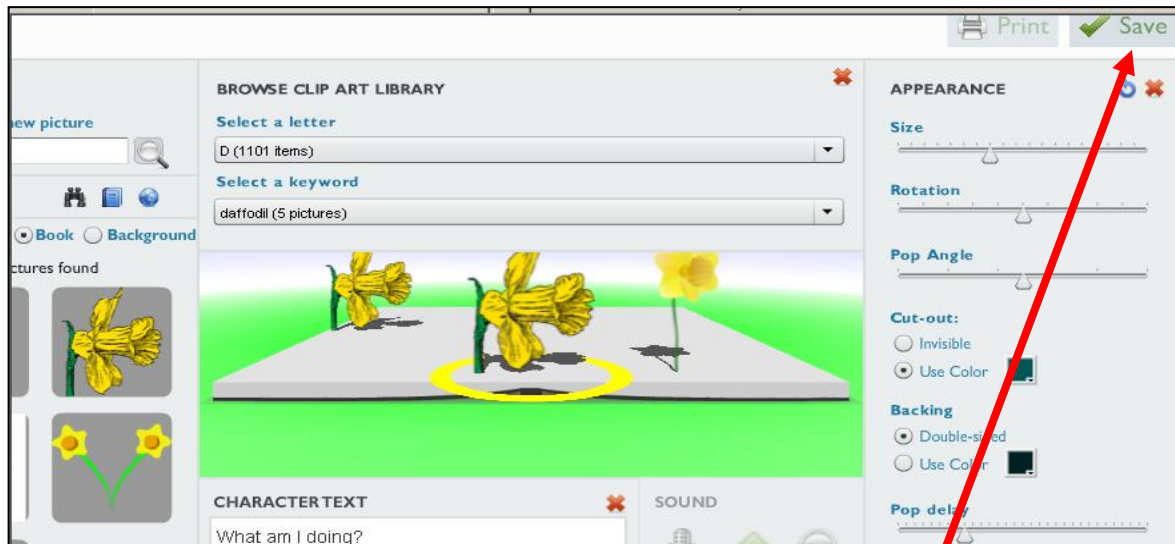

13. On the left side of the screen shows Pictures. Search for pictures through the Clip Art or upload your own pictures using the tools under the search box. Type in the box to search, pick your choice of picture, and click on thumbnail for the picture to appear in your book.

The screenshot displays the ZooBurst BookBuilder interface. On the left, the 'PICTURES' panel includes a search box for a new picture, a search icon, and icons for uploading, deleting, and saving. Below these are radio buttons to 'Add pictures to: Book' (selected) or 'Background'. The central workspace shows a 3D pop-up book on a green ground with a blue sky and white horizon. On the right, the 'APPEARANCE' panel for 'This Page' has color selection buttons for Page Color (white), Ground Color (green), Horizon Color (white), and Sky Color (blue). At the bottom, the 'PAGE NARRATION' panel has a text input field with the placeholder 'What is happening on this page?' and a red 'X' icon. The 'PAGE MANAGER' panel shows a page number '1' in a box, with navigation icons for back, forward, and delete.

14. Another screen pops up when choosing the Browse Clip Art Library. Scroll through the alphabet and then the different subjects to find the desired picture.

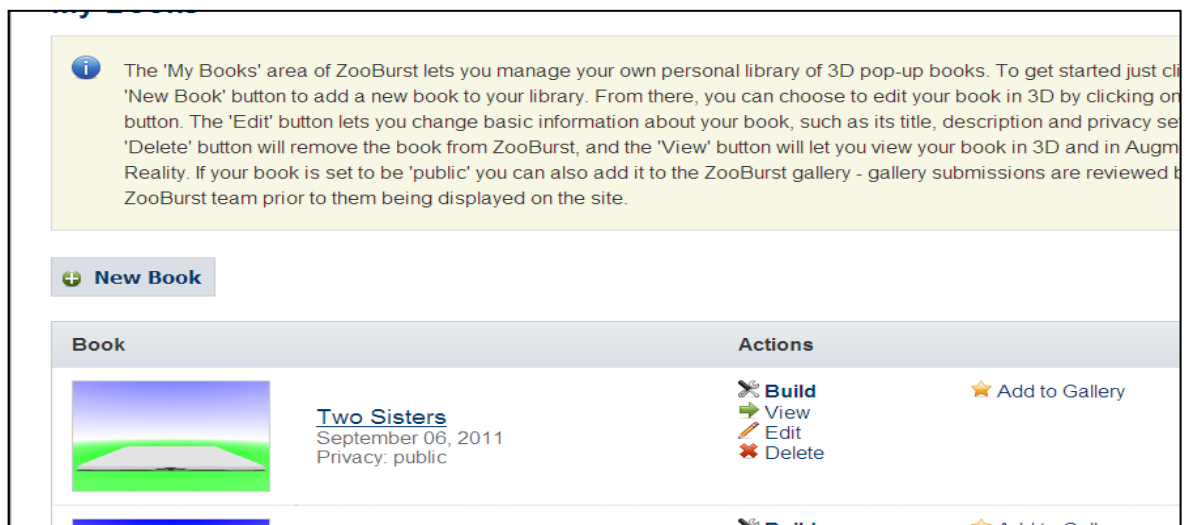

15. On the right side of the screen, there are more tools that can be used to enhance your book. The yellow and red circles show the boundaries of the pictures on the page.

16. Use the tools at the bottom of the page to add a page or sound if you have a premium account. After book is complete, be sure to save your book.

17. Go back to My Books and scroll down to see your books. Again, there are different actions for each book.

18. Now it is time to get started and create your books.

Name _____ Date _____

Documentation Page

ZooBurst

I have created a Zooburst 3-D Book that has at least 8 pages. The book follows the TEKS and pertains to grade level curriculum. I have used the book to teach to my class. I have made a screen shot of My Books list and given it to my LMS. I have also sent my book to the Gallery for everyone to be able to view it.
